ECO-SOLAR

AIR POLLUTION & ODOR CONTROL

HINSILBLON'S ECO-SOLAR ALTERNATIVE ENERGY ODOR CONTROL

Hinsilblon's Eco-Solar Odor Control Systems are powered by the energy of the sun. These environmentally safe systems are designed to neutralize fugitive odor emissions. The portable Eco-Solar Units are completely self-contained and mounted on a rugged, heavy duty trailer for mobility. This system is ideal for the treatment of remote odor sources where there is no electricity or clean water nearby. The Eco-Solar Odor Control Systems do not require gas or diesel powered engines, eliminating the exhaust emissions and noise associated with other odor neutralization equipment

THE ECO | SOLAR ADVANTAGE

COMPLETELY SELF CONTAINED

PORTABLE

SOLAR POWERED

NO WATER REQUIRED

NO NOZZLE MAINTENANCE EXPENSE

NO EXTERNAL ELECTRICAL/DIESEL/GAS

NO EXHAUST EMISSIONS

NO NOISE

RUNS 8 HOURS A DAY CONTINUOUSLY

200 GALLON TANK
